 13.010.005 - Quantity and Quality Groundwater Limited Areas 1

Chapter 13 – SUBDIVISION

Chapter 13.005 – SUBDIVISION

13.005.005 - River Road-Santa Clara Area.

In the interests of safeguarding the public health, safety and welfare, the following policy regarding major subdivision plat approval in the River Road-Santa Clara area is established, effective June 9, 1971.

- A. No new subdivision (i.e., a subdivision not previously granted preliminary and/or final approval) will be approved.
- B. Any subdivision previously granted preliminary and/or final approval that has expired will be evaluated on an individual basis.
- C. This policy shall remain in effect until such time as a program for the installation of a public sewerage system in the River Road-Santa Clara area has been undertaken.
- D. Further resolutions by the Board:
 - 1. The Board will exert all possible efforts to establish a sewerage system and is confident that this curtailment of subdivision activity is in the public interest.
 - 2. Should the conditions of potential public health hazards resulting from continued development without public sanitary sewer services, as has occurred in the River Road-Santa Clara area, occur in other areas of Lane County, the Board will take similar action.
 - 3. In the event engineered sewer plans for the River Road-Santa Clara area are adopted by Lane County or other agency, no subdivision will be approved in the area covered by such sewer plans unless "dry line" sewers are installed in the subdivision to the specifications of Lane County.

(Order 74-7-10-1, 7.10.74)

13.010.005 - Quantity and Quality Groundwater Limited Areas.

In the interest of public health and the economic well-being of the citizens of Lane County, the following areas of Lane County are to be designated quantity and/or quality groundwater limited areas, pursuant to LC 13.050(13).

- A. The following areas are designated quality limited areas for groundwater and are depicted on the "Geologic Map of Oregon West of the 121st Meridian" on file at the Lane County Department of Public Works, Land Management Division. Those applicants who are in dispute with regard to whether or not they will be withdrawing water from the referenced formations may submit a geological report performed by a registered geologist which indicates the groundwater source will not be within the referenced formations or they may submit water quality reports as required by Lane Code Chapter 13, showing the water is not quality limited:
 - 1. Areas of Natural Contamination.
 - a. That portion of the Spencer Creek Watershed in the vicinity of Pine grove Road and the south side of Erickson Road for salt water.

2. Areas of man-induced pollution or contamination.
 - a. The River Road/Santa Clara area as defined by the Willamette River on the east, the Northwest Expressway on the west and south and Beacon Drive on the north for nitrate and biological contamination.
 - b. The East Creswell area as defined by I-5 on the west, Cloverdale Road on the north, the Willamette River on the east and River Drive on the south for nitrate and biological contamination.
 - c. The Junction City South area as defined by Junction City city limits on the north, Prairie Road on the west and Highway 99 on the east to the intersection with Prairie Road for nitrate and biological contamination.
- B. The following areas are designated quantity limited areas for groundwater:
1. Broad areas of very limited groundwater.
 - a. The Spencer Creek Watershed as defined by the topographic expression of the watershed boundaries.
 - b. All of Township 16 South, Range 3 West, Sections 27, 34, 35 and 36.
 2. Specific defined areas of limited groundwater and significant potential use.
 - a. The committed lands' areas listed below are in quantity limited (QT) areas and have parcelization, which can reasonably be expected to locally exceed the carrying capacity of the groundwater system:
