ESTIMATED TONS FOR DISPOSAL USE (1.25 TONS/CUBIC YARD) _____

CONTAMINATED SOIL IS FROM: UST REMOVAL PROJECT ACCIDENTAL SPILL MONITOR WELL DRILLINGS OTHER _____

SOIL IS CONTAMINATED WITH: GASOLINE DIESEL / HEATING OIL WASTE OIL SOLVENT OTHER _____

ARE THE CONTAMINATED SOILS A HAZARDOUS WASTE? YES NO HAS THE SOIL BEEN EXCAVATED? YES NO

IS THE DEQ INVOLVED IN THIS PROJECT? YES (LIST CONTACT PERSON) _____ NO

THE FOLLOWING DOCUMENTS ARE ENCLOSED: TEST RESULTS SAMPLE CHAIN OF CUSTODY MAP OF SAMPLE LOCATIONS

Certification of Accuracy of Information

I hereby certify under penalty of perjury under the laws of the State of Oregon that to the best of my knowledge the above described waste is properly identified and is not a RCRA or Oregon State hazardous waste, and that the information given is true and complete. I have read the instructions on the reverse of this form governing disposal of petroleum contaminated soil and understand my responsibilities.

NAME (PRINT) _____ TITLE _____ COMPANY _____

SIGNATURE _____ DATE _____

CONTAMINATED SOIL DIRECTIONS

1. COMPLETE THE PERMIT APPLICATION. Fill in all required information accurately and legibly. Type or print in ink. Incomplete and unsigned applications will be returned for completion. The application must be in the name of the generator of the waste, and signed by the generator or authorized agent of the generator who is responsible for the accuracy of the information. If you are estimating the amount of soil that will be disposed, remember that disposal fees must be prepaid, so it is best to provide a margin of error by overestimating the amounts involved. You will not be allowed to exceed the approved amount without further prepayment; this may delay the project.

2. ATTACH ALL NECESSARY SUPPORTING INFORMATION. Be sure to submit:

A) Laboratory test results. At least one sample is required for each 100 tons of soil. It may be best to have additional samples analyzed; if the amount of soil has been underestimated and additional samples are required, disposal will be stopped until an Extension Permit has been submitted and approved. Only final analysis reports will be accepted; preliminary or draft results are not acceptable. If you have questions regarding testing requirements, call 682-4120 for further information.

B) A copy of the chain of custody form for the samples, as well as a map of sample locations. The map must include a general outline of the site, directional (north) arrow, project name, date, and indication of where samples were taken.

3. RETURN COMPLETED APPLICATION along with all supporting information. A \$25.00 application fee will be added to prepaid disposal fees.

4. MAKE ARRANGEMENTS FOR PAYMENT OF FEES. Disposal appointments at Short Mt. Landfill will not be scheduled until payment of fees has been arranged.

A. Payment must be made at time of disposal in the form of cash, check, credit card or Lane County charge account.

B. If the quantity of soil has been underestimated; **no further disposal appointments will be made until an extension permit is obtained.** An extension permit may be required if further testing is indicated. Approval of an extension permit may take 3-5 days and could affect project deadlines.

C. Any changes in Transporter should be reported immediately. This will apply anytime you hire a transporter other than the transporter named on the application. New Transporters are required to have a Letter of Authorization from the account holder to charge against an existing account.

5. IF YOUR APPLICATION IS APPROVED, a copy of the approved permit will be e-mailed or faxed to you. Each truck hauling on the permit needs to have a copy. A copy of your permit will also be sent to Short Mt. Landfill. Unless other arrangements are made in advance, the permit will expire three months from the date of approval. If excavation and disposal cannot be completed before the permit expires, an extension permit may be required.

6. SCHEDULE DISPOSAL APPOINTMENT(S) by calling the Short Mt. Fee Booth at 726-3047. Hours are 7:00 am - 5:00 pm. An appointment is required 24 hours before each disposal. As noted above, appointments cannot be confirmed until disposal fees have been paid and the permit approved. Dumping hours for contaminated soil are **7:30 am -- 4:30 pm, Monday-Friday**. Disposal is limited to 200 tons per day, **unless other arrangements are made in advance.** If your transporter will not be able to honor an appointment, please cancel by 10:00 am of the appointment date as a courtesy to other customers.

7. DUMPING INSTRUCTIONS. When arriving at the landfill, the driver must show a copy of the approved permit at the scale booth. **No belly dumps, or wet loads are allowed.** When dumping, follow all instructions from site operators.

8. EXTENSION PERMITS may be required when the quantity limit on the permit has been exceeded or the permit has expired before completion of the project. An extension permit, when required, requires completion of an extension application form and submission of any necessary analytical data. Allow 2 workdays for processing. Call (541) 682-3899 or (541) 682-3828 for more information.
