

HOW MUCH DOES IT COST?

A \$25 per dishware type, per day cost is assessed for dishes. Between 1 and 4 waterstations can be delivered for a \$50 fee.

Fees include delivery, pickup and sanitation services, and are payable directly to Action Rent-All.

An additional \$50 fee for late/early delivery and/or pickup per day also applies.

FOR EXAMPLE, FOR A TWO- DAY EVENT:

- Delivery of between 250-1,000 plates would cost event organizers \$25 for each of the two days the items were used.
- Delivery of between 250-1,000 forks would be an additional \$25 per day.
- If delivery/collection service outside of normal contractor operating hours is required before the event opens on day one, and after the event closes on day two, an additional \$50 per delivery/ collection fee would be applied per day.

In this scenario, the total cost to the event producer is \$200.

HOW DOES IT WORK?

1. The team at Action Rental-All will work with your event to determine what dishware is a good fit for your food service needs.
2. This program replaces disposable plates and utensils with durable and reusable plates, bowls, cups, and silverware and provides sanitized water refilling stations.
3. After eating at their chosen vendor, event goers return dishes at established bussing/drop-off stations that have been identified during the event planning phase.
4. Action Rental-All collects the dirty dishware from the drop off stations and transports them back to their industrial, state-of-the-art washing facility for washing and sterilization.

Sustainable Events Services Program

Lane County, in partnership with the city of Eugene and Action Rental-All & Events, offers durable dishware and water bottle refill stations to event producers that want to provide high-quality durable dishware instead of disposable paper plates, plastic forks, etc. that end up in the trash.

The Sustainable Events Services Program will deliver dishware that has been cleaned and sanitized to your event, and will collect the dirty dishes after its conclusion, all for much less than the cost of purchasing disposable food service ware.

WE MAKE IT EASY TO GET STARTED

The Sustainable Events Services Program is affordable, requires minimal staff training and can be implemented quickly.
