ASSOCIATED SOIL-DISTURBING DEVELOPMENT PERMITS

Development Permit Number:	Status of Permit (If permit is not finalized, provide a description of the remaining work to be done):

CERTIFICATION

- ☐ All soil disturbance activities addressed by this erosion prevention permit have been completed.
- ☐ The site has undergone final stabilization of all exposed soils through vegetation, paving, or building construction.
- ☐ All stormwater discharges from construction activities that are authorized by this permit have been terminated.
- ☐ All temporary BMPs have been removed.
- ☐ All temporary plastic BMPs, such as plastic netting, have been removed.
- ☐ Those BMPs that are not being kept and stored for future uses have been properly disposed of.

Date above items were completed:	OR: <input type="checkbox"/> Project was cancelled with no disturbance taking place.
----------------------------------	--

Please read the certification statement carefully before signing. **The Responsible Person shall sign.**

I certify that all soil disturbances associated with construction activity on this site that are authorized by this erosion prevention permit have been terminated. I understand that I am no longer authorized to disturb the soil associated with construction activity under this permit, and that discharging sediments and pollutants contrary to LC 9.090 is a violation of code and may require additional permitting. I also understand that submittal of this certification does not release a permittee from liability for any violations of any other county, state, and/or federal permits and/or requirements.
